IEEE Electronic Library

IEEE *Xplore*® Digital Library Subscription Option

Drive innovation with the most comprehensive collection from IEEE

The IEEE Electronic Library (IEL) contains one-third of the world's current literature in electrical engineering, communications, and computing. IEL provides researchers, engineers, and students access to technology's most trusted journals, conference proceedings, and standards—millions of articles to help fuel imagination, build from previous research, and inspire new ideas.

IEL delivers key benefits for researchers:

- **Drive new ideas,** designs, and applications with cutting-edge research
- **Develop better solutions faster** by understanding the technology landscape
- **Stay ahead of advancements** and benchmark competitor research
- **Increase productivity** by reviewing previous research without having to reinvent the wheel
- **Accelerate innovation and patent development** with convenient access to proven research all in one place
- **Increase scholarly output** and new research development

New subscription titles for 2021*

Always at the forefront of technology, IEEE adds new journals every year:

- *IEEE Transactions on Artificial Intelligence*
- *IEEE BITS the Information Theory Magazine*

*Listing current as of 09/2020 and is subject to change.

Research you need at an exceptional value

Subscribing to all publications included in IEL would cost more than US$1.4 million. A typical IEL subscription includes more content for just a fraction of the price. With pricing tailored to the needs of your organization— you can be sure you're getting the best value for your money.

Quick Facts

Save time and money with convenient access to vital technology research:

Unlimited access to approximately 5 million full-text documents, including:

- More than 1 million articles from 195 top-cited IEEE journals, magazines, and transactions
- Over 3.6 million conference papers from as far back as 1936

More than 4,600 approved and published IEEE standards, excluding drafts

Proceedings from IET conferences and events

IEEE Redline Versions of Standards (where available), select VDE conference papers, IET's *E&T Magazine*, and seminal articles from *Bell Labs Technical Journal* archive

Backfile to the late 1800s for many titles, complimentary with an active subscription.

IEEE

IEEE Electronic Library
Delivered through the IEEE *Xplore®* Digital Library

Access respected technology research that generates results

IEEE *Xplore* includes **top-ranked journals and technology research that is cited in patents three times more often than any other publisher.** With approximately 5 million full-text articles and papers, IEEE *Xplore* is your gateway to more than 30% of the world's current literature in electrical engineering, electronics, and computing.

Find relevant research faster with powerful search tools

IEEE *Xplore* combines an easy-to-use interface with powerful search features that make finding relevant research faster and more efficient.

Search: With a robust search engine, Basic, Advanced, and Author search options and a "Refine/Expand Results" module let users modify and find results more easily.

Personalize: Users can also personalize IEEE *Xplore* to create targeted saved searches and table of contents alerts, and set personal preferences.

New Features: These include improved discoverability of content including Featured Authors, Featured Articles, and News and Updates; new remote access options to ensure users are seamlessly connected to the content they need; the ability to download complete PDFs and issues for select content sets; and the option to follow your favorite IEEE author with new Author Alerts.

IEEE *Xplore* also provides:

- Approximately 5 million documents in full-text PDF format, with more than three million in a robust, dynamic HTML format
- Multiple authentication options for on-site, remote, and mobile users
- Abstract/citation and bibliographic records for subscribed content
- Mobile-friendly design
- Daily content updates

Get the latest research in a wide range of technologies including:

- Aerospace and Defense
- Biometrics
- Computer Hardware and Software
- Cyber Security
- Electronics
- Internet of Things (IoT)
- Medical Devices
- Nanotechnology
- Optics
- Power Engineering
- Robotics
- Semiconductors
- Smart Grid
- Telecommunications
- Wireless Technology
